

Roxspur Measurement & Control Ltd.

Roxspur Measurement & Control Ltd (RM&C) is one of the UK's largest privately owned instrumentation manufacturers with over 85% of sales produced in our modern UK facilities.

We have a comprehensive range of temperature, pressure, flow and level measurement products widely proven in diverse and challenging sectors such as water, energy, automotive, offshore exploration, medical, fire, glass, steel and aerospace. Our customer base includes many blue chip companies, for example Rolls Royce, Tata and British Energy.

Our products include sensors, thermocouples, thermometers, transducers, transmitters, flowmeters and controllers. We also offer a range of associated products including pumps, displays, power supplies, data recorders, portable calibrators and thermal imaging cameras.

RM&C provide bespoke instrumentation solutions to meet the exacting requirements of our customers. Our modern cell based manufacturing facilities are fully flexible for small and large batch runs, enabling us to provide short lead times even for customised products.

This in-house manufacturing and testing is backed up by our own UKAS accredited laboratory for pressure, temperature, flow and electrical parameters. A team of field-based engineers provide a full calibration, maintenance and repair service throughout the UK.

RM&C also has a Measurement Systems division with a dedicated team who develop and install full system solutions. Our capability ranges from a simple process control panel to specialised analytical/environmental monitoring projects for defence/nuclear applications.

RM&C is an ISO 9001:2008 quality approved company offering UKAS traceable calibration with BS/ENISO17025 accredited procedures. Our certificate generation systems have been designed to meet the strict and detailed requirements of the aerospace industry.
